

NOT ALL OFFICES ARE MADE THE SAME.

OFFICE DIVIDER SCREENS, MADE TO FIT YOUR NEEDS.

IF WE MAKE IT WE CAN MAKE IT DIFFERENT

ECO has been manufacturing office screens since the early 1970's and are the original inventors of the Desk Top Screen & Tool Rail.

To ensure quality control, it is a core policy of ECO Manufacturing, that all products and sub-assemblies are entirely manufactured within our Cambridgeshire factories.

All metalwork is cut, shaped and welded in-house. Wood sections are machined, sanded, stained and varnished in our own timber mill. Epoxy resin finishes are applied and gas oven dried. All upholstery is carried out by ECO's in-house trained staff.

Adhesives are applied in health & safety controlled conditions. By backing up our manufacturing ability with in-depth stocks of all the required raw materials, ECO can not only offer fast delivery of consistently high quality products, but can quickly produce one or more bespoke products to solve your particular needs.

Bespoke office divider screens by ECO.
