1st January 2026 Trade Price List

Deliveries

All deliveries are undertaken in the first instance by ECO's vehicles to the customer's premises within ECO's designated areas of delivery, delivery data card supplied upon request.

Where the customer requires the delivery to be quicker or to go to an address that is outside ECO's designated delivery areas and where the use of a third party carrier service is needed to achieve the said delivery then an extra charge for packing and carriage may apply and the delivery will be at the customers own risk.

Information

ECO product codes are shown in centimetres, height first then width second.

Freestanding and linking screens are supplied with either stabilising feet (STD) or adjusting feet (ALF) as required and to your choice.

All prices are net trade excluding V.A.T.

Orders below the value of £200 + VAT will carry a handling charge of £20 + VAT

Please read the pages 65-66 for ECO's terms and conditions plus product details.

ECO is committed to lowering its impact on the environment, our recycling system is for its manufactured products, ECO will collect and recycle its products when requested free of charge.

Products that at the design stage have components with sound reducing qualities designed into them to help combat office noise pollution, suitable for quiet rooms and meeting areas.

ECO uses particle board, MDF, fibre board and all wood products from eco friendly forestry sourced from farmed and sustainable plantations.

This product range can be modified to suit your needs as may be required by the customer from time to time.

Foam and fabric components comply with (Fire) (Safety) Regulations S.I. 1324 1989, BS 476, Part 7, Class 1 or BS5852 Class 0, 1, or BS 7176: 2007.

We confirm our product guarantees against fair wear and tear for the period shown. All products is supplied fit for purpose intended.

Band A

Elfin

by
ECO

Elfin is a plain open weave screen or panel fabric available in twelve selected commercial colours, it is our most popular screen fabric by far. This open weave fabric has excellent acoustic absorbing qualities, and acoustically benefits screens and wall panels alike.

Designed to be used on floor standing screens, desk dividers and sound absorbing products.

Cleaning your fabric, vacuum often, wipe clean with a damp cloth or shampoo using a proprietary upholstery shampoo.

Photographic fabric scans are not colour accurate. Fabric samples are available upon request.

Technical information

Abrasion: 50,000 cycles
 Application: Office screen panels
 Colour match: Batch to batch colour variations may occur within commercial tolerances
 Composition: 100% Polypropylene
 Flammability: BS476 part 7 (class 1), BS EN 1021-1: 1994 (cigarette), BS1006 level 5-6
 Light fastness: 240gsm approx per square metre.
 Weight: 1630mm

3. Band C

Alpha acrylic desk dividers

Alpha desk dividers from the Phonetic range feature a robust four-sided aluminium frame, providing durability and stability. The frame is made from 6063 T5 aluminium and comes in three finishes, Black, Silver & White.

Alpha desk dividers come with standard clamps for a 25mm desk top, but if needed, wider clamps can be obtained at an extra cost.

This makes the Alpha divider screens versatile and adaptable to different desk configurations, helping to create more private, focused workspaces in an office environment.

Alpha Grey Tinted Acrylic Screens

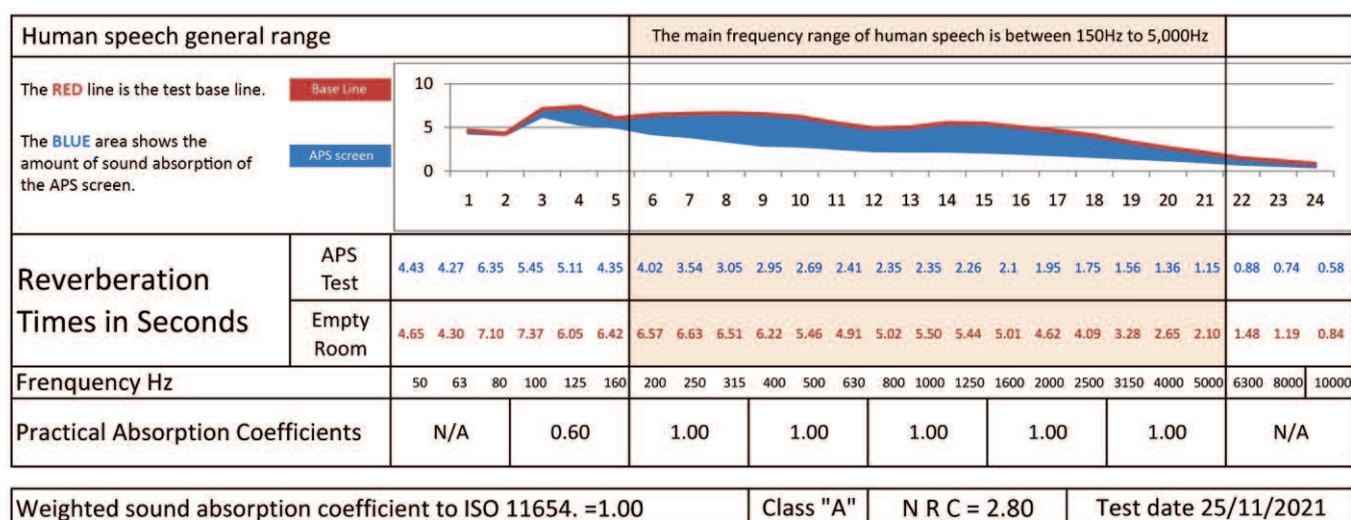

APS - Class "A", NRC 2.80 acoustic screen

ECO's best sound absorbing, acoustic partition screen.

The practical absorption coefficients test BS EN ISO 354:2003

Weighted sound absorption coefficient to ISO 11654

APS Acoustic Partition Screens are ECO's best sound absorbing room dividing product, they have been designed solely with the purpose of combating office noise pollution.

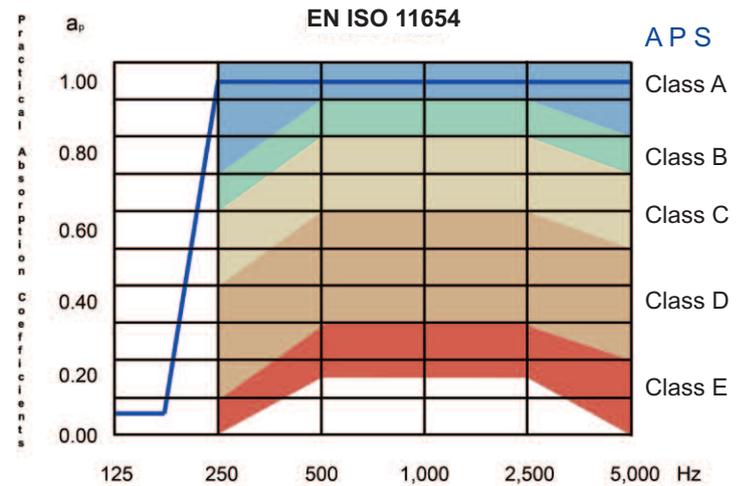

The APS's internal structure is made from fibre board sourced from farmed and sustainable plantations, with the inner core filled with high density mineral wool, which has non-directional fibre orientation, this means, sound waves are trapped and vibrations dampened every time sound passes through an APS screen.

The high density mineral wool used in APS screens, has been tested and Quiet Mark (TM) approved.

APS Excellent NRC 2.8 sound absorbing panels

APS screens an impeccable acoustic pedigree, delivering Class "A" (NRC 2.8) sound absorption to the office environment.

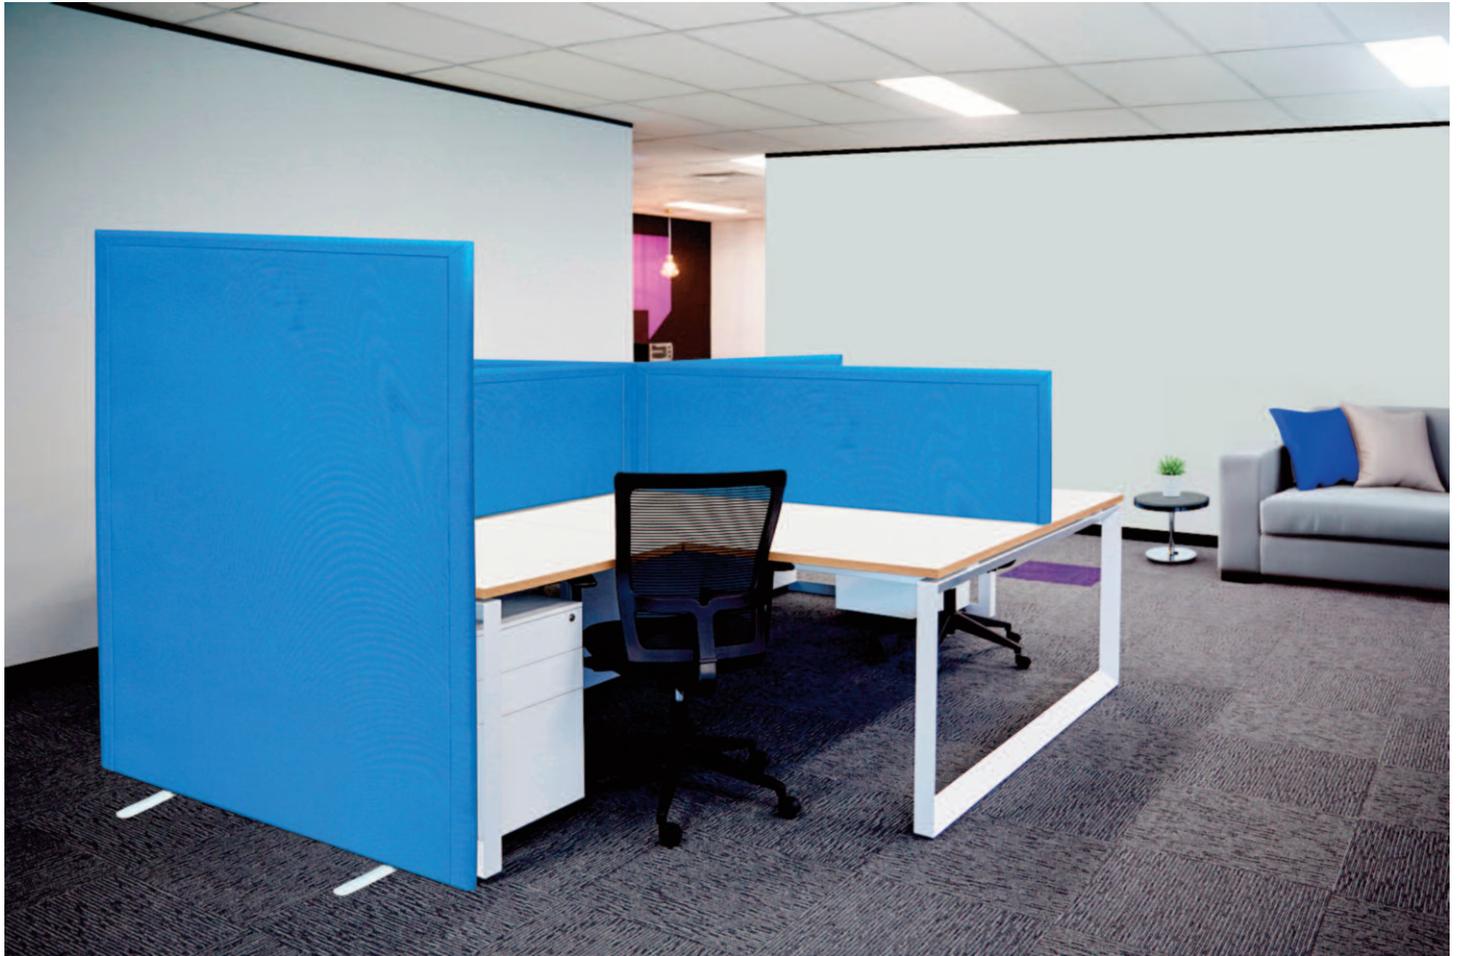

There are five classified classes of sound absorption in the BS EN ISO 354:2003. Class A being the highest class, Class E is the lowest class.

APS screens achieved CLASS "A" in all relevant sections.

APS - Class "A", NRC 2.80 acoustic screen

ECO's best sound absorbing, acoustic partition screen.

The APS Sound Absorbing Partition Screens, are designed to be an effective solution for reducing office noise pollution, and are ECO's best sound absorbing room dividing screens, the APS system was solely designed for the purpose of combating office noise pollution.

APS Acoustic Partition Screens are ECO's best sound absorbing room dividing product, and have been designed solely with the purpose of combating office noise pollution.

Sound absorption is measured using the sound absorption coefficient alpha (α), which has a value between 0 and 1.00. Zero represents no absorption (total reflection), and 1.00 represents total absorption of the incident sound = Class "A".

The APS's internal structure is made using fibre board sourced from farmed and sustainable plantations, plus high density mineral wool with non-directional fibre orientation, which fills the central core of the screen, trapping sound waves and vibrations as they travel through the screen, this construction design, significantly absorbs sound waves every time they pass through an APS screen.

When strategically placed APS screens will greatly reduce office noise pollution, making them ideal for creating quiet rooms or zones in open-plan offices.

The Rockwool mineral wool used in these screens has received the Quiet Mark™ approval, indicating its quality in reducing noise levels.

Acoustic Wall Baffles (AWB) are designed to combat noise pollution in office environments, enhancing sound quality and reducing excessive noise. These baffles absorb sound waves, preventing echoes and reverberation, which can make conversations and other noises overwhelming in open office spaces or areas with poor acoustics.

The AWB & AWBD design not only improves acoustic comfort but also can contribute to the aesthetic appeal of the office by blending into the décor or serving as decorative elements. With the AWBD giving greater sound absorption.

Hexagon

Bamboo Grove Screens

This Bamboo screen combines the natural beauty of real bamboo with the convenience of artificial leaves, ensuring a lush, green aesthetic without the need for maintenance. The natural colours and textures of the bamboo help soften any space, making it a perfect choice for creating calming, intimate areas.

Its versatility allows it to blend seamlessly into a variety of environments, whether it's an office, lounge, or public space.

When strategically placed, these screens can enhance privacy, create defined zones, and foster a sense of tranquillity, all while maintaining an eco-friendly and stylish design.

The bamboo is sourced from farmed, sustainable bamboo grove plantations, ensuring that it is an environmentally conscious choice.

By supporting these plantations, you are also contributing to the livelihoods of third-world farmers, further emphasizing the screen's role in promoting sustainability and social responsibility

C range aluminium frame desktop screens, versatile and a durable solution for office environments, particularly where flexibility and long-lasting performance are required. These divider screens offer 4 height options to accommodate different office setups, ideal for creating privacy in shared spaces or reducing office distractions.

Lightweight and compatible with sit-stand desks despite their strength, the screens are light enough to be used with motorized sit-stand desks, allowing flexibility without compromising on stability. Backed by an 8-year guarantee, C range screens are built to last, ensuring a solid long-term investment.

C range desk dividers, strong and light

Printed logos and photos

The C range screens can be printed with logos or photos, offering a personalised touch for businesses that want to reinforce branding or add visual appeal.

Name:	C Range.
Properties:	Light weight.
Style:	Desk top or side fitted.
Type:	Flat top only.
Designed for:	Offices areas and sit stand desks.

Aluminium:	Extruded using 6063 T5 tensile strength aluminium.
Aluminium finish:	Anodize coating natural finish.
Anodize quality:	Anodized to exterior finish thickness 13 -15 microns.
Bespoke sizes:	Special sizes are priced to the next larger size.
Clamp brackets:	26mm come as standard, 49mm & 90mm are available.
Core:	Paper honeycomb core is a 100% recyclable material & environmentally sustainable.
ECO content:	An average of 96% of the screen content is recyclable.
Fabrics:	Stock fabric Elfin, all Camira fabrics available to order.
Flammability:	BS 476, Part 7, Class 1 or BS5852 Class 0, 1, or BS 7176:2007 Depending on the fabric, environment and substrate.
Foam:	Combustion Modified to comply with Schedule 1 Part 1 of the Furniture & Furnishings (Fire Safety) Regulations S.I. 1324 1989.
Height allowance:	Desk top screens are 8mm less than stated to allow for the thickness of the clamps.
Height adjustment:	Side fitting clamps allow the screen to fit on the side and below the desk.
Height:	The screen height is measured from the corner brackets.
Heights:	40cm, 50cm, 60cm & 70cm.
Packing:	Packed with cardboard corners and heavy polythene wrap.
Thickness:	28mm.
Width allowance:	The width tolerance is plus or minus 0.5%.
Widths:	80cm, 100cm, 120cm, 140cm, 160cm, 180cm & 200cm.

Charlie, Inspiring Spaces

Charlie Inspired, relaxed office spaces.

Charlie modular dividers offer a flexible and robust solution for dividing spaces in open-plan office environments.

Designed for use in multiple configurations, whether arranged in action groups, lined up in rows or providing flexibility in shaping different office layouts. They are suitable for touchdown areas, collaborative spaces, personal workstations, or private offices, all the time adapting to the specific needs of the environment.

The sound absorption of these screens is Class "A" NRC 1.10, making them particularly effective in open-plan offices areas where noise reduction is important for productivity and focus.

Charlie screens provide stability while maintaining an elegant, modern look. Their modular nature makes it easy to rearrange or expand them as needed, allowing you to create unique and inspiring spaces tailored to the demands of the workspace. Ideal for companies looking to design flexible, sound-dampening spaces in their environment.

The D range is Class "A" NRC 1.10 sound absorbing acoustic floor and desk screens, and are an excellent solution for creating quieter, more focused office environments.

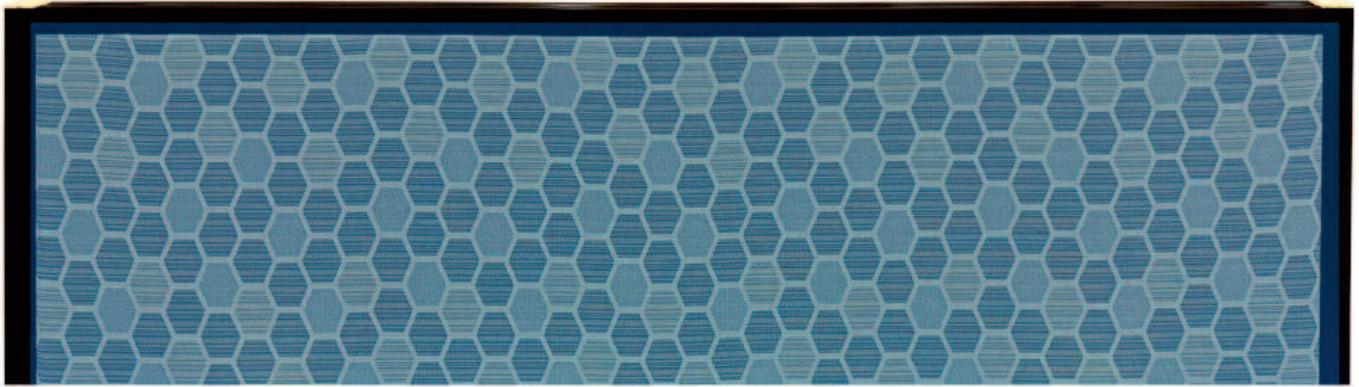

With Class "A" sound absorption, the D Range screens are designed to effectively reduce noise pollution in the working environment, making them ideal for offices where controlling sound levels is a priority.

The linking system is both invisible and strong, ensuring that the screens maintain a seamless appearance while still providing robust structural support. The hidden linking system securely connects the screens, making 2, 3 or 4 way configurations simple and stable.

STRONG, EASY, QUICK & INVISIBLE LINKING SYSTEM.

D range screens Class "A" NRC = 1.10, sound absorbing panels

The D Range Class "A" Workspace System Screen is a high-performance solution, designed for optimising acoustic control in office environments.

Name:	D Range.
Properties:	Heavy weight acoustic construction.
Style:	Work hubs and shared workspaces.
Type:	Class "A" acoustic, SRL Ltd tested, test BS EN ISO 354:2003.
Designed for:	Reducing noise pollution in shared workspaces.
Aluminium:	Extruded using 6063 T5 tensile strength aluminium.
Aluminium colours:	Available in anodised silver, black or white finish.
Anodise quality:	Anodised to exterior finish thickness 13 -15 microns.
Bespoke sizes:	Special sizes made to order, price on application.
Feet brackets:	Choice of 4, stabilising STD feet supplied by default in frame colour.
Core structure:	P2 particle board, MDF and plywood.
Fabrics:	Stock fabric Elfin, most Camira fabrics and to order.
Flammability:	BS 476, Part 7, Class 1 or BS5852 Class 0, 1, or BS 7176:2007 Depending on the fabric, environment and substrate.
Foam:	Combustion Modified to comply with Schedule 1 Part 1 of the Furniture & Furnishings (Fire Safety) Regulations S.I. 1324 1989.
Guarantee:	8 year guarantee against fair wear and tear.
Height allowance:	Screen sizes are as stated, plus 25mm uplift when using STD or ALF feet.
Height:	Screen height is measured from the corners, with a plus or minus of 0.5%.
Heights:	210cm, 180cm, 165cm, 150cm, 135cm, 120cm & 105cm.
Linking system:	Easy, quick and hidden joining strip allows 2, 3 & 4 way linking.
linking strip:	Included with the screen, fitted in the vertical end post.
Packing:	Packed with cardboard corners and heavy polythene wrap.
Thickness:	An overall thickness including the fabric and foam is 41mm.
Width allowance:	The width tolerance as stated with a plus or minus of 0.5%.
Widths:	60cm, 80cm, 100cm, 120cm, 140cm, 150cm & 160cm.

Half vision

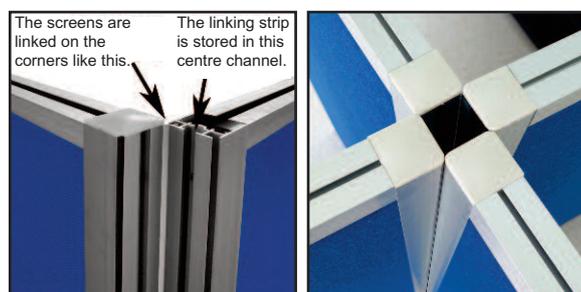

D Range vision screens use acrylic shatter proof panels which are available in Clear, Grey or Bronze, Clear is fitted unless specified.

The Top Vision panel is 45cm in depth and the Half Vision panel would be approximately half the height of the screen e.g. an 180cm high screen would have approximately 90cm of vision panel.

D range 180cm high mobile screens, due to the height are fitted with HDCF Heavy Duty Castor Feet, for greater stability.

E range panels Class "A" NRC = 1.10 sound absorbing screens

E Range data sheet - product specifications

Name: E Range
Acoustic test: Class "A" - NRC 1.1
Properties: Heavy duty contract range
Style: Floor and desk screen dividers
Top styles: Flat, angle, wave and radius
Types: Flat, curved & visions
Designed for: High demand work areas

Acoustic E range test: Class A sound absorption, tested by Sound Research Labourites Ltd to NRC 1.10.
Acoustic Tests: The practical absorption coefficients test BS EN ISO 354:2003 & the EN ISO 11654 test.
Acoustic Test Classes: There are five classifications of sound absorption in the EN ISO 11654 test, Class A being the highest class and Class E is the lowest class. E range achieved Class A, the highest class.

Bespoke sizes: Special sizes and shapes made to order.
Clamp brackets: DT clamp range, DT2 as standard, 8 other styles are available.
Core frame: P2 particle board core frame & ply wood where required.
Core panels: MDF medium density fibre board.
Edge styles: Linking or non-linking, in UPVc.
Edge finish: Black, dark grey, light grey & fabric covered are all the same price.
Fabrics: Stock fabric Elfin, all Camira and other fabrics available to order.
Fabric flammability: BS 476, Part 7, Class 1 or BS5852 Class 0, 1, or BS 7176:2007 depending on the fabric, environment and substrate.

Feet: STD stabilising feet or ALF adjustable levelling feet supplied as required, other styles available.
Foam: Combustion Modified to comply with Schedule 1 Part 1 of the Furniture & Furnishings (Fire Safety) Regulations S.I. 1324 1989.

Guarantee: 8 Year fair wear and tear, based on an 8 hour working day.
Height allowance: Desk top screens are 8mm less than stated to allow for the thickness of the clamps and floor screens are 25mm less than stated to allow for the feet.

Heights, desk divider: 40cm, 50cm, 60cm, 70cm & 80cm. Plus special heights as required.
Heights, floor divider: 105cm, 120cm, 135cm, 150cm, 165cm, 180cm & 210cm. Plus special heights as required.
Height allowance: The height tolerance is plus or minus 0.5%.
Packing for ECO vans: Packed with cardboard corners and heavy polythene wrap.
Packing for carriers: Packed as required, extra costs may apply.
Thickness: Overall thickness 36mm.
Width allowance: The width tolerance is plus or minus 0.5%.
Widths desk divider: 80cm, 100cm, 120cm, 140cm, 150cm, 160cm & 180cm. Plus special widths as required.
Widths floor divider: 60cm, 80cm, 100cm, 120cm, 140cm, 150cm & 160cm. Plus special widths as required.

Class A sound absorption

Tested by SRL Ltd to NRC 1.10

Screen thickness is 36mm

Pinboard, 10cm internal rail fitted on both sides

Shape top screens have no internal pinboard

8mm cable space under all screens as standard

Clamps included with screen, 9 styles available

DT2 clamps supplied if clamp style not specified

Fabric or UPVc edges are the same price

Fabric edged screens, have 5cm rounded corners

UPVc colours, black, dark grey & light grey,

Light grey trim supplied unless specified

Screens can be linking or non-linking

Bespoke screens available in this range

Fabric edge

UPVc edge

Edge colours:- Black, Dark grey & Light grey.

Order fabric or UPVc edges the price is same.

Fabric edged screens, have 5cm rounded corners.

E Range Class “A” Desk Top Dividers

Desk Vision Dividers

Width	Height	Style	Product Code	Elfin	Band B	Band C
160cm	70cm	Vision	EPDTV 70/160	223.22	240.69	254.84

		Shape Tops	16.50	16.50	16.50

All the above sizes are shown in Centimetres.

The weighted sound absorption coefficient to ISO 11654. = 1.00 Class “A” NRC 1.10.

The SM range fits around the desk edges, allowing all three sides to be screened with minimal loss of your desk work surface. SM screens incorporate a 8mm gap between screen and desk to allow for cable feed.

The height of the screen you order will be made 10cm higher automatically, this 10cm extra screen is the section that sits below the desk top and accommodates the SM clamping brackets. A 40cm high EPSM screen will be made 50cm overall. SM2 light grey clamps are supplied as standard and are included in the price.

Edge colours:- Black, Dark grey & Light grey.

When ordering E Range screens, list the height first, followed by the width. Screens can be ordered as either linking (LK) or freestanding (FS) by replacing the * in the product code after "E" with the appropriate option.

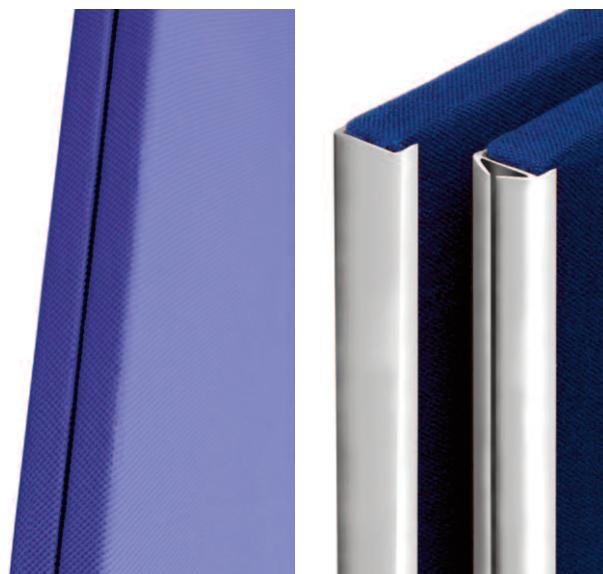

Linking Screens add 20mm to the overall width due to the linking mechanism. All floor standing screens, linking or non linking come with (STD) stabilising feet included in the price, you can choose a different style of foot the price is the same, except castor feet.

For a complete list of available feet types and pricing, refer to the back of this price list.

Fabric edge

UPVc edge

Edge colours:- Black, Dark grey & Light grey.

Order fabric or UPVc edges the price is the same.

Fabric edged screens, have 5cm rounded corners.

E Range Top Styles

S = Shape Wave

R = Radius

RT = Radius Top

A = Angle

FA = Full Angle

D = Dome

RD = Reverse Dome

Shape, Radius top, Angle, Dome & Reverse dome reduce by 20cm by default, other sizes to order.

E range acoustic Class “A” NRC = 1.10 sound absorbing screens

ECO Vision screens strike a balance between privacy and visibility, providing users with a semi-private barrier while still allowing a view of surrounding office or public areas.

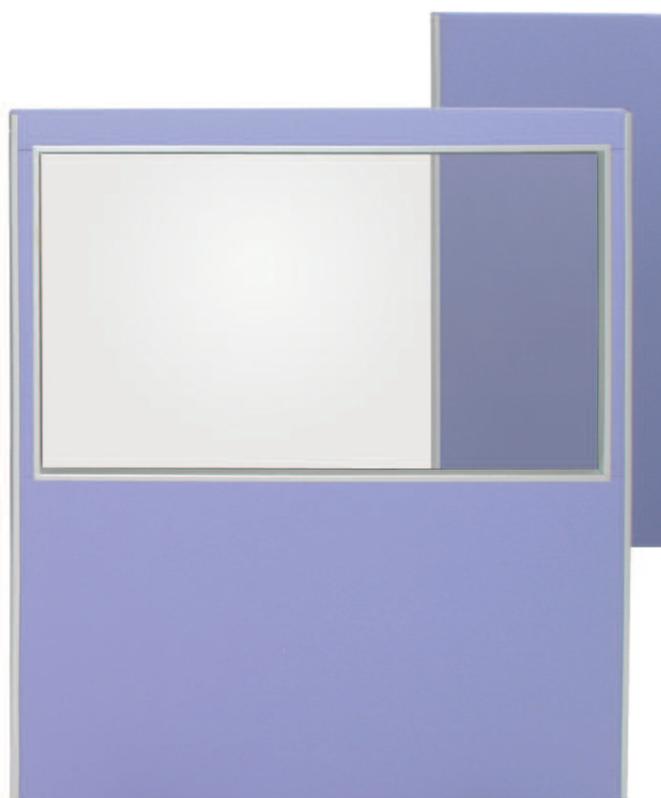

This can be especially useful in open workspaces or shared environments, where maintaining a sense of personal space and visual connection to the broader area is beneficial.

E Range vision screens come with acrylic, shatterproof panels available in Clear, Grey, or Bronze, with Clear as the default option unless otherwise specified.

The Top Vision panel has a depth of 45 cm, while the Half Vision panel is approximately half the screen height.

For example, on a 180 cm high Half Vision screen, the panel would be approximately 90 cm tall. Full Vision screens have a maximum width limit of 1000 mm.

All the above sizes are shown in Centimetres.

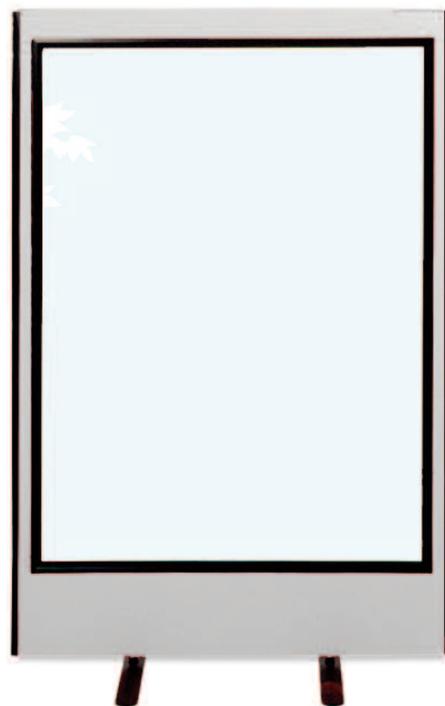

E range Acoustic Class “A” NRC = 1.10 sound absorbing screens

With four curve options, the ECO Vision screens offer flexible configurations to fit various desk shapes and corner arrangements.

The Four curve options includes:

1. Sharp 90-Degree Curve: Ideal for space requiring clear boundary definition, creating a squared-off angle for precise coverage.
2. Large Radius Curve: Offers a gentler curve that blends into larger open areas, maintaining visibility while establishing a subtle partition.
3. Medium Radius Curve: Balances privacy and openness, suitable for all office arrangements.
4. Tight Curve for 90° Angle (1200mm): Designed specifically for tighter spaces, this curve fits around 80cm radius corner desks, providing privacy without compromising desk area.

These options make it simple for customising work space layouts while meeting privacy needs.

All the above sizes are shown in centimetres, except the radius curve which is shown in metres.

E range internal door

Width	Height	Product Code	Price
100cm	210cm	EID internal door	465.10
	210cm	Wall mounted fitting	21.00

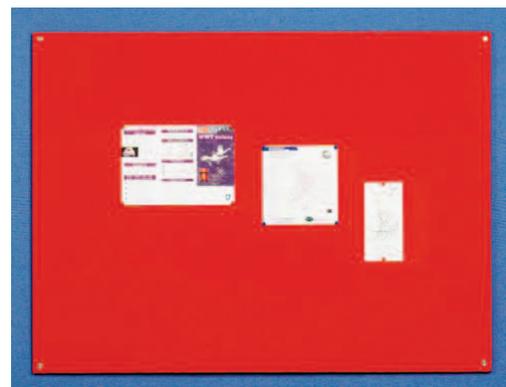

The E Range door combines robust design with functionality, featuring a heavy steel frame measuring 210cm in height and 100cm in width, which includes a linking edges for seamless integration with other E Range screens.

The door itself is crafted from varnished wood veneer, with or without a glazed section, sized at 200cm by 80cm, and comes equipped with a secure lock and three keys.

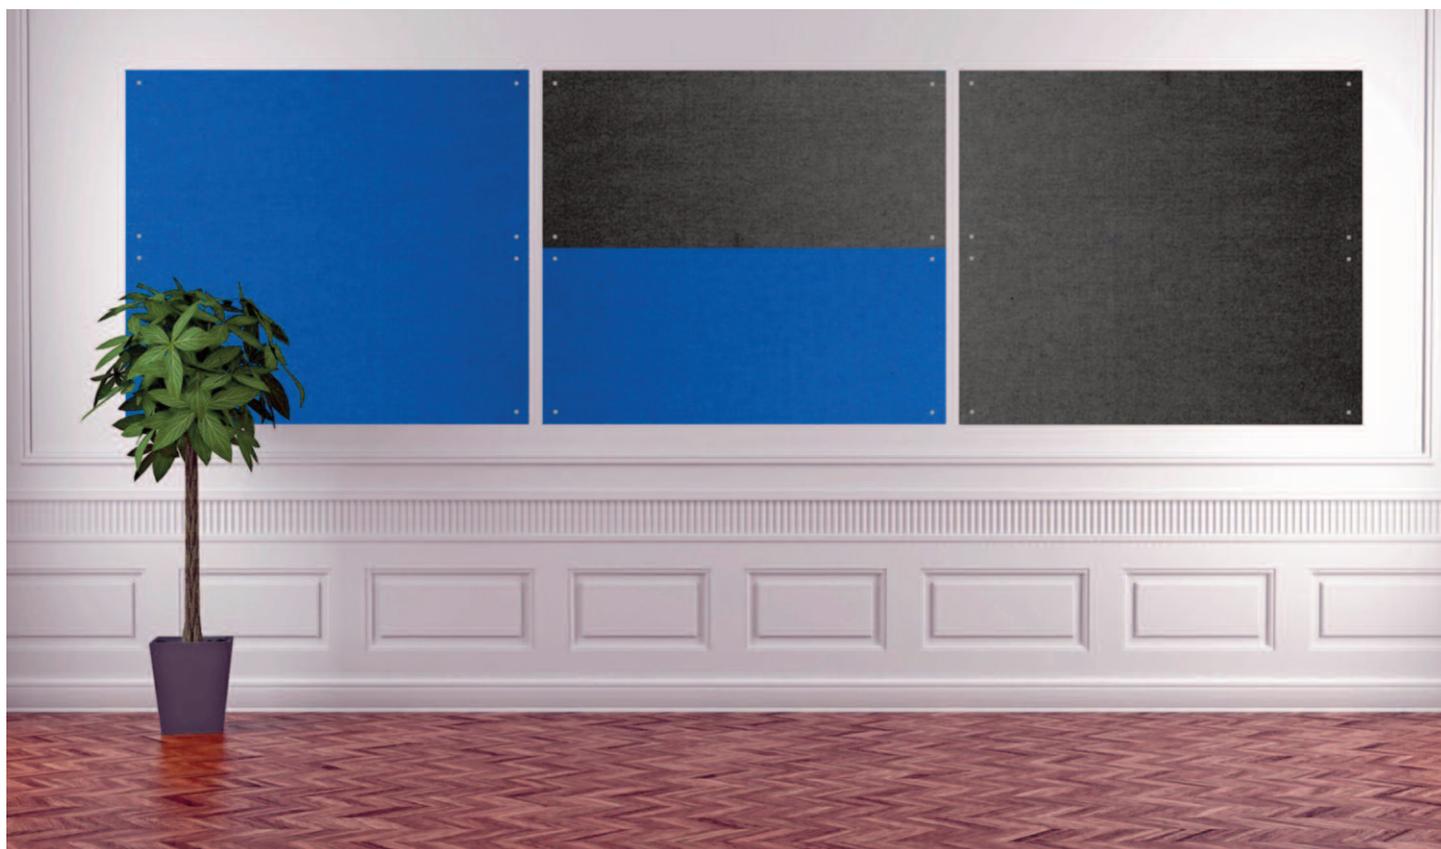

This door system allows users to construct a lockable, secure room by joining it with other E Range screens or fitting a wall mounted fitting which allows you to fit the door or screens directly to a wall.

The EUF display boards are crafted with durability, cost-efficiency, longevity, and environmental responsibility in mind. Made from fiberboard sourced from sustainably managed plantations in Finland, they reflect a strong commitment to eco-friendly production.

The core of these boards features self-healing properties, allowing for repeated pinning without significant wear. Built to be both economical and resilient, they are constructed to withstand frequent use while maintaining a neat appearance. Additionally, with a composition that is 95% biodegradable by weight, these boards offer an environmentally conscious solution for display and acoustic needs.

Galaxy screens offer various fitting options to suit different office setups, all of which are included in the screens price.

These options enhance the adaptability of Galaxy screens, making them a practical choice for your office configurations.

1. Standard Clamps: Choice of nine standard clamps from the DT range, for a strong and secure attachment to the desk.
2. Stabilizing Feet: Ideal for added stability when used in freestanding configurations.
3. Height-Adjustable Feet: Allows flexibility in screen height, catering to various desk and workspace layouts.

The Galaxy range of floor-standing screens combines excellent quality with budget-friendly pricing. These screens are available in Elfin flame-retardant fabric, with edge trim options in light or dark grey for a sleek and adaptable look.

The Galaxy screen has a maximum width of 160cm, providing ample coverage for privacy and office work spaces.

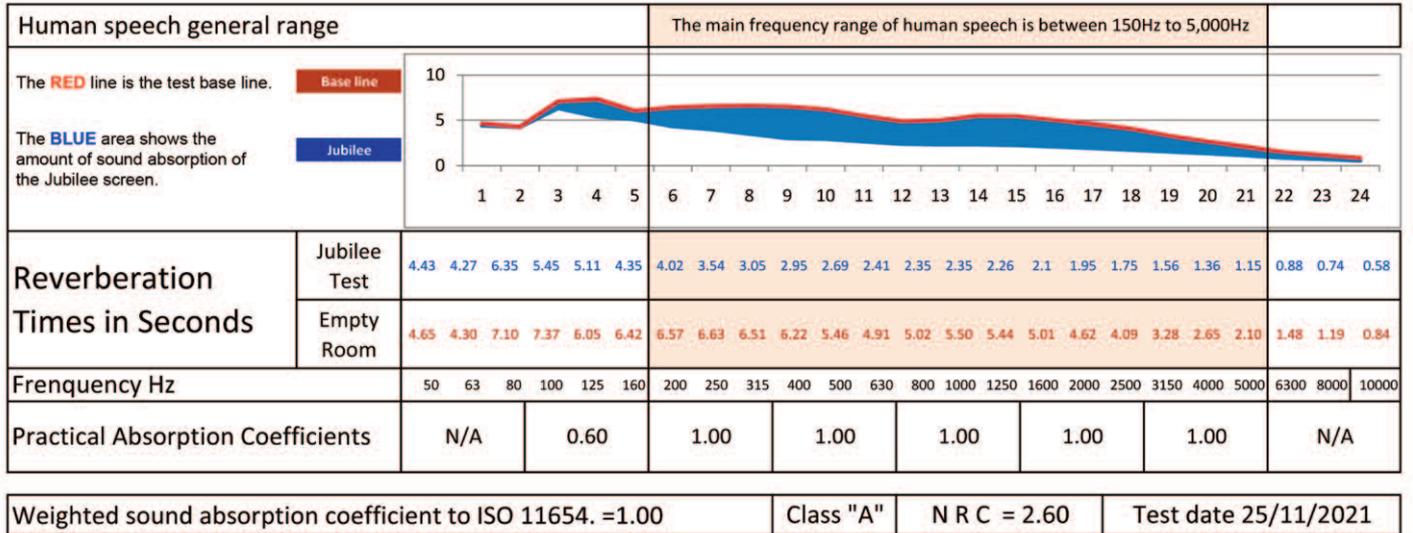

When specifying sizes, note that dimensions should be ordered with height listed first, followed by width. Each screen is backed by a three year guarantee, ensuring durability and value. For a full list of available feet and clamp prices please refer to pages 68 and 69.

Jubilee acoustic Class “A” NRC = 2.60 sound absorbing screens

Jubilee a superb sound absorbing, acoustic partition screen.

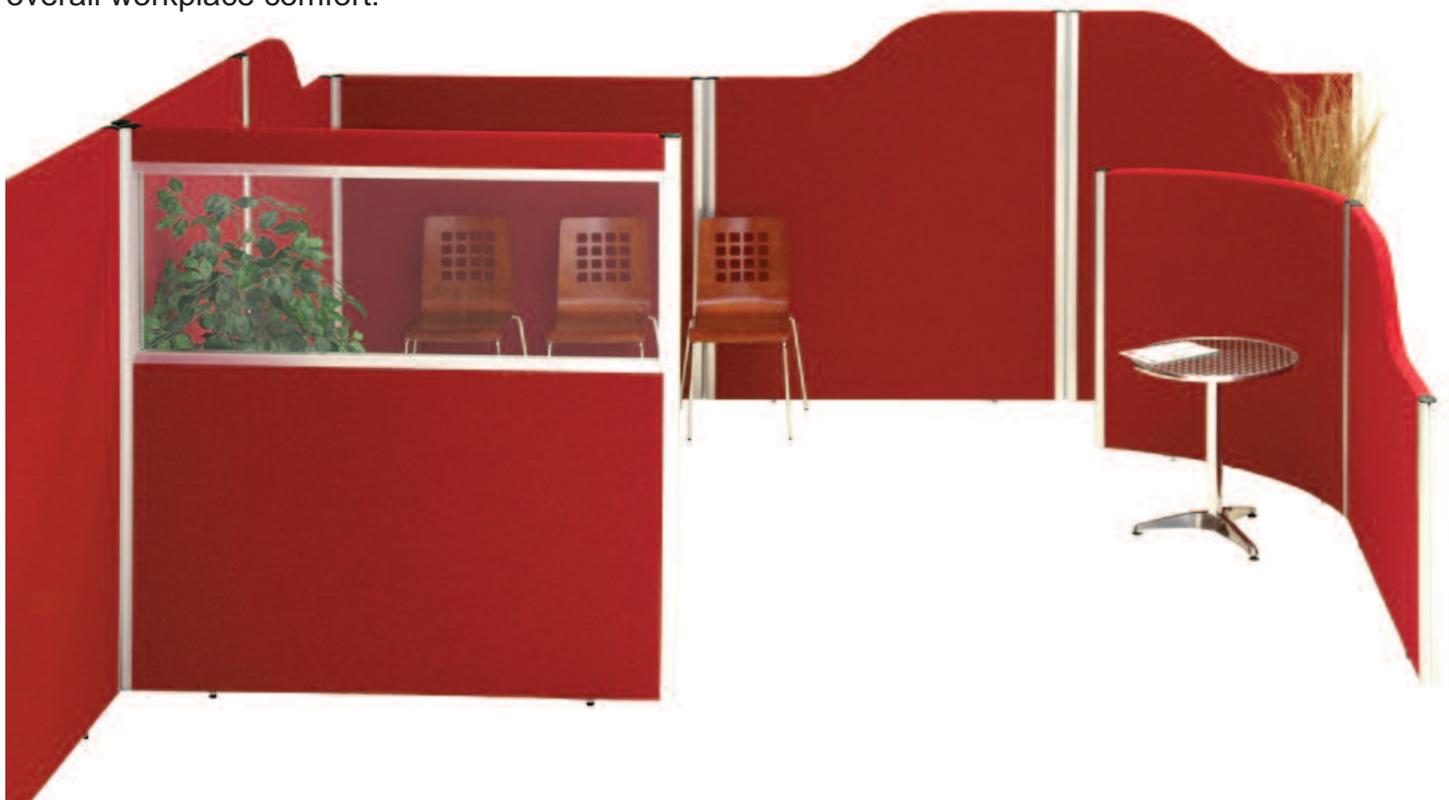

Practical absorption coefficients test BS EN ISO 354:2003

The Jubilee Range of sound absorbing screens is a premium solution in acoustic screening, achieving the highest level of sound absorption with a Class “A” rating, with an impressive Noise Reduction Coefficient (NRC) of 2.60.

Designed by professionals with over 40 years of acoustic expertise, these screens effectively reduce office noise, promoting a quieter, more productive workspace.

According to the EN ISO 11654 standard, acoustic performance is rated from Class A (highest) to Class E (lowest), placing Jubilee screens at the top of the scale. This makes them an ideal choice for environments where controlling sound is essential, delivering superior noise reduction and enhancing overall workplace comfort.

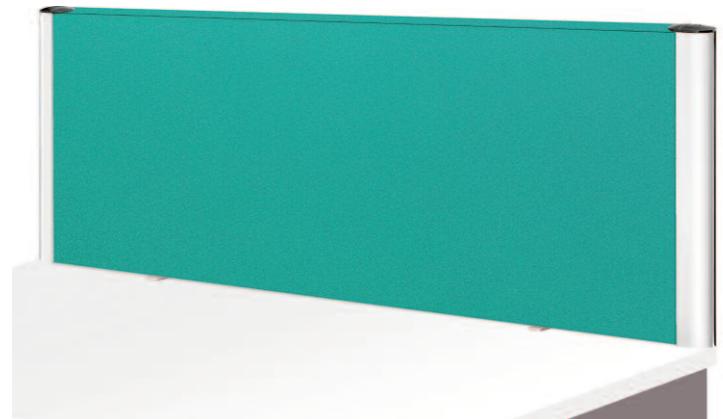

Jubilee acoustic Class “A” NRC = 2.60 sound absorbing screens

The Jubilee Desktop Screens have long been a trusted choice, offering countless customers the benefit of quieter office spaces through advanced sound absorption.

From the outset, these screens were designed with sound management in mind, achieving outstanding Class A acoustic performance with a Noise Reduction Coefficient (NRC) of 2.60.

Combining smart design with a seamless, easy-linking system, Jubilee desk screens provide both functionality and superior sound control.

Ideal for workplaces prioritising noise reduction, these screens create a more focused, productive environment without compromising on style or ease of use.

Jubilee acoustic Class “A” NRC = 2.60 sound absorbing screens

The Jubilee Vision screens provide a balance of privacy & visibility, designed for office and public spaces where an overview is beneficial.

These screens feature shatter-proof acrylic vision panels, available in Clear, Grey, or Bronze, with Clear as the default option.

The screens come in two panel styles, top vision which is 45 cm deep, giving a consistent line of sight, and the half vision panel which begins halfway up the screen height; for instance, on a screen measuring 180 cm, the vision panel starts at around 90 cm.

These options ensure adaptable visibility and privacy in various environments, allowing the screens to seamlessly fit into diverse office layouts or public areas where both openness and discretion are required.

All the above sizes are shown in Centimetres.

All the above sizes are shown in Centimetres.

The Jubilee Vision screens offer flexibility in both privacy and visibility.

Top Vision Panel: A fixed 45 cm acrylic panel at the top provides an upper view, with the remaining screen upholstered for privacy.

Half Vision Panel: Begins halfway up the screen height. For instance, a 210 cm high screen would feature a 105 cm upholstered lower half, with the acrylic vision panel above.

Full Vision Screen: For an unobstructed view, these screens are available in a full acrylic panel but are limited to a maximum width of 100 cm.

This versatility allows for tailored solutions in open and partitioned environments.

The RB Contract Screens are designed with an MDF core, layered with combustion modified foam & covered in flame-retardant fabric. Available in a variety of shapes, sizes, and colours.

Fabric edge: Choose from a fabric finished edge or a UPVc edge, the price is same, fabric edged screens have 5cm round corners. To order fabric edges, just specify (fabric edges) in your order.

UPVc Edges: UPVc edges are available in black, dark grey, light grey & silver, round corners are available to order.

Unless specified otherwise, light grey UPVc edges are supplied by default.

The RB desk top dividers are ideal for custom-made screens, featuring a strong & sturdy inner core, ensuring reliability and strength in the manufacture, for your required shape.

This adaptability makes the RB Range a versatile solution for unique design specifications.

RB Floor dividers

RB contract office screens designed for a hard life in busy offices, made with MDF internal faces which are covered with combustion modified foam and flame retardant fabric.

RB screens are available in a variety of shapes, sizes and fabric colours, the edges can be fabric finished or have an impact resistant UPVc coloured edge. The edge colours available are. Light grey, dark grey, black & silver, with the UPVc light grey supplied unless specified otherwise.

When ordering the sizes you required please write the height first then the width. RB Range screens can be either linking or floor standing with STD or ALF feet as you require.

To define your requirement put LK for linking or FS for floor standing, after the RB by replacing the * in the opposite product code.

The linking mechanism adds 20mm overall to the width of the screen.

Fabric edge: Choose from a fabric finished edge or a UPVc edge, the price is same.

UPVc Edges: UPVc edges are available in black, dark grey, light grey & silver, round corners are available to order.

The RB Vision screens are designed to allow a measure of privacy, but also give an overview of other office or public areas.

The acrylic shatter proof vision panels are set into these screens and can be Clear, Grey or Bronze, Clear is fitted unless specified.

The Top Vision panel is 45cm in depth and the Half Vision panel would be approximately half the height of the screen e.g. an 180cm high screen would have the vision start at approximately 90cm.

Full Visions are 100cm wide. Linking edges are only available on vision screens.

0.8m Curve

There are four choices of curves, from a shallow curve giving a large circle, to a tight curve giving a complete 90° right angle.

RB Curved floor dividers

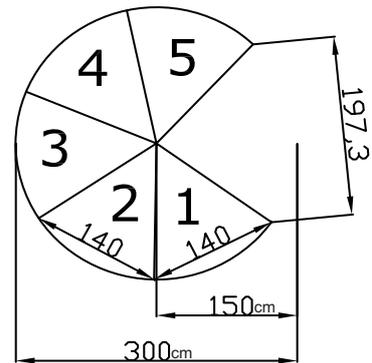

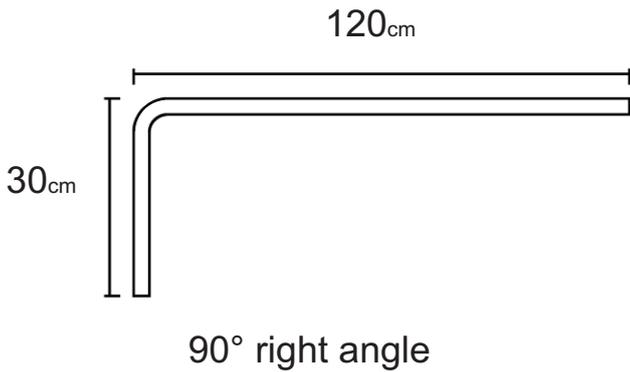

The right angle curve screen is the cornerstone of ECO's RB range of office meeting booths & pods, the right angle curve screen is designed to provide flexible and private meeting spaces within office environments.

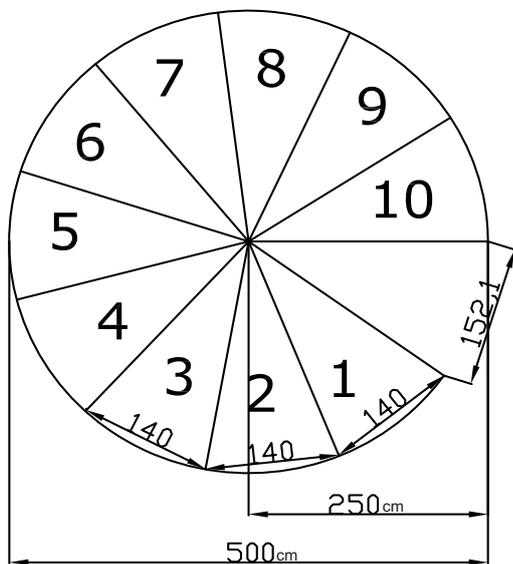

Ideal for team discussions, briefings, and brain storming sessions, RB screens feature a unique, simple linking connector system for effortless fitting & relocation when required.

Different size footprints are easily achieved, giving you the possibility of meeting pods & booths with many different heights & area sizes according to your needs.

The Smarty Acrylic desk partitions offer a streamlined, sleek solution for modern office spaces, enhancing organisation while providing a variety of customisation options to meet diverse preferences and needs.

Constructed from durable 5mm acrylic, available in clear/tinted, opaque, and frosted finishes for design flexibility. Each screen comes with clamps, and you can choose from a full range of clamps and brackets to ensure a perfect fit for your setup.

Offered in three shapes, Oblong, Radius, and Wave. Allowing you to select the ideal match for your desks with consistent pricing across all styles.

Defining your requirement is simple. For an Oblong, Radius, or Wave shape, add "O" for Oblong, "R" for Radius, or "W" for Wave to the product code, followed by the height and length. For example, the product code for an Oblong style screen with dimensions. SA* 40/160 for would be SAO 40/160.

This approach ensures that each customer can easily specify their preferences, making it a straightforward process to customize their office setup with Smarty Acrylic desk partitions.

The Smarty Backdrop screens offer versatility and style with their range of customisable options. Available in three heights, three top styles, and five edge finishes. Smarty Backdrop screens are an ideal addition of today's professional environments, providing functionality and aesthetics.

Smarty Backdrop screens are side-mounted on the desk's edge, providing an extra 20cm of screen dropping below the desktop. This additional overhang is not included in the ordering size. Example, if you require a 30cm above-desk screen, you will be supplied with a 50cm screen (30cm above, 20cm below).

To specify your requirements for Oblong, Radius, or Wave style, replace the * in the product code by inserting O for Oblong, R for Radius, or W for Wave style, followed by the height and length. For instance, "SB* 40/160" for an Oblong style would become "SBO 40/160."

UPVc edges come in black, dark grey, light grey & silver. Light grey is the default option. Whether you opt for fabric or UPVc edges the price is same.

Smarty Backdrop come with SM clamps with the SM2 light grey being the default option, see page 63 for a full list.

The Smarty F Desktop Screens are a sleek solution to modern office spaces. Their simple, clean design and customisable edge finishes offer versatility and style while seamlessly blending into various workplace aesthetics.

The fabric edged finished desktop screen provide a neat and contemporary look, perfectly complementing the demands of today's professional environments.

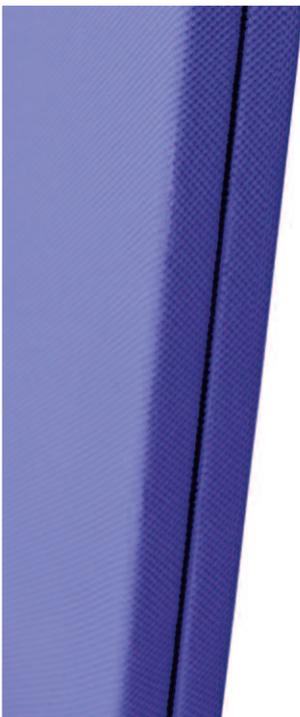

With their emphasis on economical simplicity, cleanliness, and style, these screens are sure to enhance any work-space while providing functionality and aesthetic appeal.

Available in 3 heights, 3 top styles & 5 edge finishes.

For Oblong, Radius or Shape top styles replace the * in the product code by inserting O for Oblong, R for Radius & S for Shape style.

Smarty F have 8 clamp types to choose from, SF2 clamps are supplied with the screen unless specified otherwise.

The wave shape drops by 20cm and the radius goes down to 0cm.

Fabric edges

Whether you opt for fabric or UPVc edges the price is same.

Choose from a fabric finished edge or a UPVc edge, the price is same. UPVc edges are available in black, dark grey, light grey & silver. Unless specified otherwise, light grey UPVc edge is supplied by default.

Smarty Plus acoustic desktop screens

8yr
guarantee

Smarty Plus acoustic desktop screens Class “A”, NRC 1.80 - EN ISO 11654

A superb sound absorbing, acoustic desk divider screen.

Tested to Class “A” EN ISO 11654-NRC 1.8 by the Sound Research Laboratories Ltd.

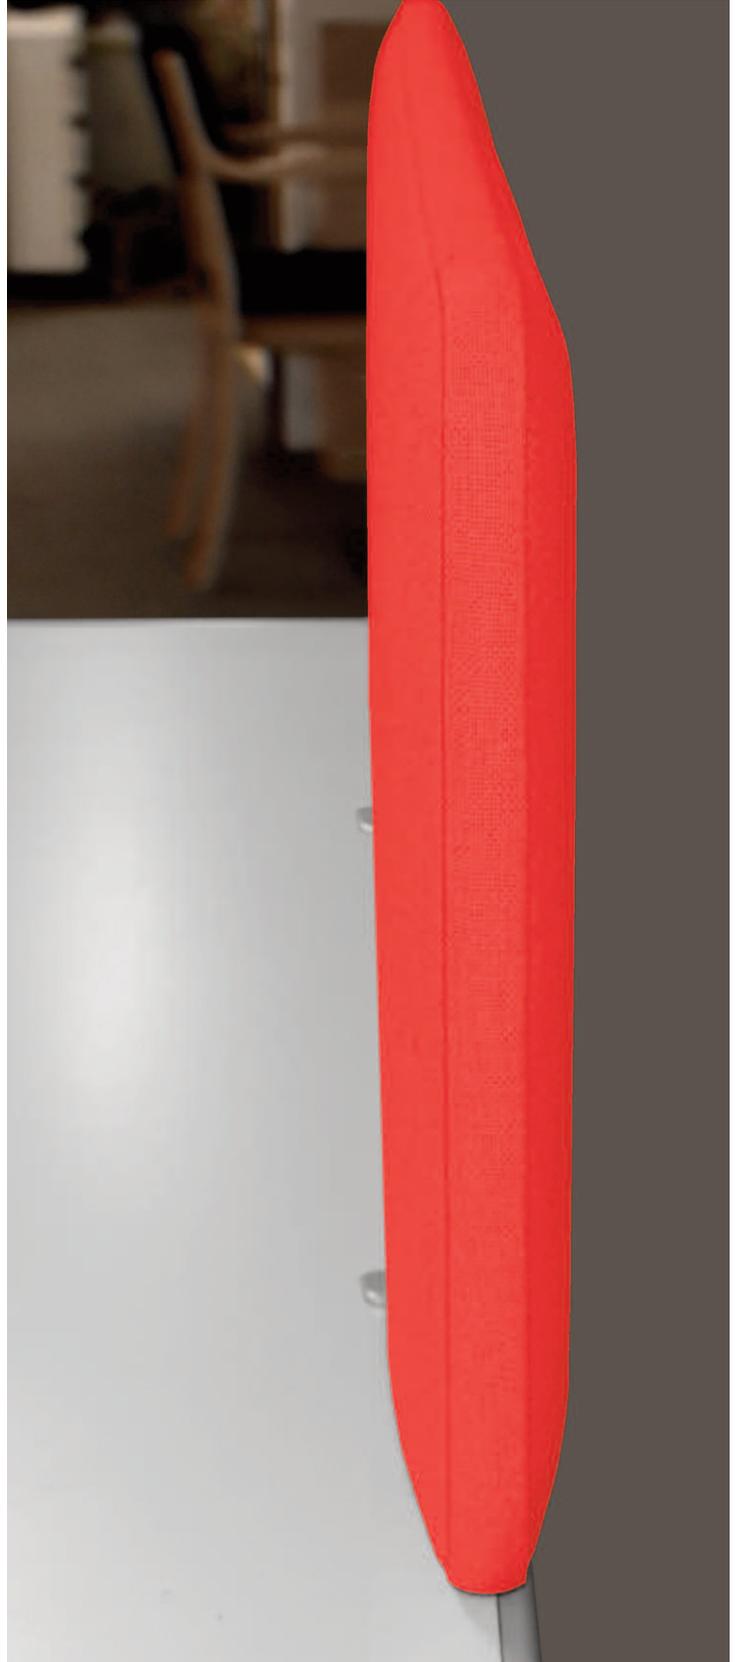

The Smarty Plus Desktop Screens an innovative solution for noise reduction in office environments. The incorporation of several layers of acoustic materials within a 55mm thick screen is impressive in the amount of sound reduction, and noise pollution mitigation it achieves.

Covering all edges in fabric is a design choice as it not only prevents noise refraction but also adds a touch of aesthetics to the screens. By employing multi-directional fiberboard and foam layers, the screens effectively reduce sound transmission each time sound passes through, contributing to a quieter and more productive workspace.

The availability of three different heights for the screens offers flexibility in tailoring the setup to specific needs, allowing for a larger footprint above the desk. This feature not only enhances noise reduction but also potentially provides added privacy and concentration for employees.

Overall, the Smarty Plus Desktop Screens is a well-rounded solution for creating a more comfortable and efficient office environment.

The SF range of clamps colours. Black, light grey, dark grey & silver.

The Medical Desk Acrylic Screen, a straightforward and effective solution for creating a protective barrier in office environments. Their design specifically targets the prevention of airborne infections, providing a physical barrier that can help mitigate the spread of germs.

Easily assembled in minutes, allowing for a quick implementation without disrupting workflow. The 5mm clear cast acrylic construction not only offers durability but also resistance to anti-bacterial cleaning agents and surface cleaning alcohol, which are crucial for maintaining a clean and safe workspace.

LBO Letter box opening is cut in the middle and at the bottom, 10cm x 30cm are available as an optional extra.

SA clamps are included in the screen price, for extra sets see page 63, they are in light grey only, at £13.29.

Medical Extension Acrylic Screens a practical solution for enhancing infection protection in office settings. By adding extra height to existing office dividers, they provide an additional layer of safety without the need for extensive modifications or replacements. Quick, easy installation at minimal cost adds appeal to businesses looking to prioritise the health and well-being of their employees and clients.

The materials used in the Medical Extension Acrylic Screens (MEAS) are both durable and practical. Clear cast acrylic is a great choice for transparency and cleanliness, and the easy wipe, easy clean panels make maintenance straightforward. The availability of different heights provides flexibility to suit various divider setups, whether they're on desks or floor screens. This adaptability will help create an additional barrier against infections, contributing to a safer working environment.

The EA range of clamps are included in the screen price.

MEAS Screens helps gives infection protection against airborne disease.

MFV - Medical Floor Vision screen

60cm	180cm	MFV 180/60	134.74

The MFV full vision screen is a KD "knock down" design it creates a quick and strong physical barrier between your staff and or visitors, as and when the need arises.

It has been predicted that covid contagion will ebb and flow over many years, these full vision screens are ideal for a quick response.

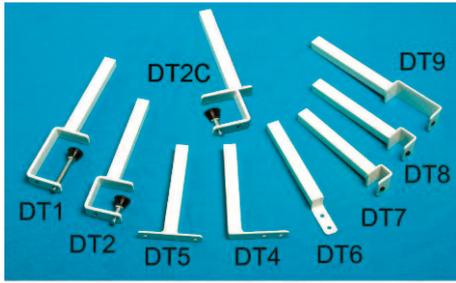

Store them away when you don't need them and then in just a few minutes you can reassemble them to create a physical barrier of up to 2 metres high up to a width of 120cm.

Self standing and made from a 5mm clear acrylic with an easy to clean surface that can be quickly cleaned with Ethyl Alcohol 70% or anti bacterial wipes.

The metal vertical frames have 4 clamps on either side and will support a 2.0 metre high acrylic sheet, the metal frame is finished in light grey.

Lead Times

Manufacturing lead times for the majority of our products are geared to complete your order in time for the next delivery to your area. However this is subject to our manufacturing capacity, which may vary from time to time. This means that we normally require a lead time of 2 weeks from receipt of the final order details, to enable us to make and load your order onto the next available vehicle to your required delivery area.

Small order charge

Orders below the value of £200 +VAT will carry a handling charge of £20.00 +VAT

Deliveries

All deliveries are undertaken in the first instance by ECO's vehicles to the customer's premises within ECO's designated areas of delivery. ECO will endeavour to deliver to another delivery address if so instructed and if at all possible, if an address is outside the normal delivery areas of its ECO's vans and if a third party carrier is required to complete this delivery then an additional charge may be levied.

Where the customer requires the delivery to be quicker or to go to an address that is outside ECO's designated delivery areas and where the use of a third party carrier service is needed to achieve the said delivery then an extra charge for packing and carriage will apply and the delivery will be at the customers own risk and expense.

General terms & conditions
